Joey,

Thank you for taking my call today. As mentioned, we will be applying for a noise variance for the Mitchell Rd. Industrial job (formerly Watkins Rd. Industrial). We are anticipating the work to be done between the dates of 12/15 and 2/15, between the hours of 10 pm and sunrise. This will be done intermittently, with most weeks having 2 to 3 scheduled pours, most of which should not take up the full time between 10 and sunrise.

This noise will be from concrete pouring and finishing, and trucks entering/leaving the site. It should not get above 85 dB.

Please let me know if you have any additional questions, and thank you for your help!

**Alexandra (Ally) Noble**

Assistant Project Manager
