Issue Sheet

File Number: 2018-340

Agenda Date: 8/6/2018

Version: 1

Status: ATS Review

In Control: City Council

File Type: Authorization

Agenda Number: G.

WARD: All Wards

COMMITTEE: Public Safety

\$ IMPACT: \$58,970.00 (Funded by SPLOST)

Agenda Title:

Approval of ten (10) Severe Weather Outdoor Warning Sirens to warn residents of impending severe weather, Phase II SPLOST expenditure in the amount of \$58,970.00 from Allcomm Wireless, Inc, 1508 Noble St., Anniston, AL.

ISSUE: The City of Smyrna relies on Severe Weather Outdoor Warning Sirens to warn residents of impending severe weather. The Severe Weather Outdoor Warning Sirens are digitally controlled and can be activated from either the 911 Center or from Emergency Management (Fire Dept). These sirens rely on our 800mhz radio system for communication/operation, and each of the sirens have a 800mhz "mobile" type radio.

BACKGROUND: This is a P25 phase I & II radio system upgrade required by Cobb County. This is the final expenditure in the overall city-wide radio upgrade project. In order for the system to activate the siren warning system, Phase II was required to upgrade the sirens to become compliant with the P25 radio upgrade project.

RECOMMENDATION/REQUESTED ACTION: Staff recommends Approval
