Riverview Landing Project - Riverview Road near Dickerson Drive

Mr. Bagwell,

The Cobb County-Marietta Water Authority (CCMWA) owns a 36" diameter ductile iron water main on Riverview Rd. As a part of the Riverview Landing development that your company is helping to construct, a 42" diameter reinforced concrete storm pipe must be installed underneath CCMWA's water main. CCMWA understands that a proposal exists to close Riverview Rd. on June 6th, 2016 for this installation.

CCMWA would like to make note that we support the road closure request for multiple reasons. Not only will it allow you to install the storm piping, but it will also allow CCMWA to perform needed maintenance on our water main at this location. In order to perform the water main maintenance and to install the storm piping, depressurizing the water main will be required (pressures in this area of our system are over 200psi). This will allow CCMWA to perform needed maintenance and create a much safer environment for Astra to install the storm piping. It would be a "win-win" for both parties.

If you have any questions, please contact me.

Sincerely,

Jacob Wilson, EIT, PMP
Project Engineer
