Dear Rusty,

Thank for your efforts thus far with our Special Land Use Permit for Whitefield Academy. Since our original submittal we have been working with the architect and campus to further develop the project program and phasing. It was come to our attention that the footprint of the proposed Lower School building will need to be made larger than originally anticipated.

The increase in square footage is primarily due to the potential need to accommodate a separate Lower School kitchen and cafeteria. Originally we thought that the Lower School would be able to share the facilities in the Commons Building. It should be noted that the increase in square footage is not going to increase projected enrollment over what was in our original application.

I have included the amended master plan per our discussion.

Should you have any questions or concerns, please let me know.

Thank you-

**Alan Wieczynski, RLA, LEED AP BD+C**
