REZONING ANALYSIS

Section 1508 of the Smyrna Zoning Code details nine zoning review factors which must be evaluated by the Planning and Zoning Board and the Mayor and Council when considering a rezoning request. Please provide responses to the following using additional pages as necessary. **This section must be filled out by the applicant prior to submittal of the rezoning request.**

1. Whether the zoning proposal will permit a use that is suitable in view of the use and development of adjacent and nearby property.

There are several parcels in the neighborhood that have been rezoned to allow for two (2) homes to be built on the property. What we are requesting will be consistent and suitable with not only the new construction but also the existing homes

2. Whether the zoning proposal or the use proposed will adversely affect the existing use or usability of adjacent or nearby property.

The proposed rezoning will provide additional affordable housing which is a challenge not only in this neighborhood but surrounding areas as well. It will not adversely affect the existing use or usability of adjacent or nearby property

3. Whether the property to be affected by the zoning proposal has a reasonable economic use as currently zoned.

The current parcel can support a single family home however because of the cost of the land it would not result in an affordable unit. To ensure a reasonable economic benefit not only for the neighborhood but for the applicant the requested rezoning would be required

In addition if the rezoning as result of parcel split does not occur the existing comparable sales in the neighborhood would not support construction of just one single family unit

REZONING ANALYSIS (CONTINUED)

4. Whether the zoning proposal will result in a use which will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities or schools.

The zoning proposal will provide two additional homes on the subject property verses one
home. The result would be one additional family with one or two vehicles. As a result there
would not be an excessive or burdensome use on streets, transportation facilities, utilities or schools
There is a new school that has capacity and the existing infrastructure can handle additional
vehicles

5. Whether the zoning proposal is in conformity with the policy and intent of the land use plan.

The zoning proposal will confirm with the existing land use plan which is medium density homes

6. Whether there are other existing or changing conditions affecting the use and development of the property which give supporting grounds for either approval or disapproval of the zoning proposal.

To our knowledge there are no proposed or existing conditions affecting the use and development
of the property.

REZONING ANALYSIS (CONTINUED)

7. Whether the development of the property under the zoning proposal will conform to, be a detriment to or enhance the architectural standards, open space requirements and aesthetics of the general neighborhood, considering the current, historical and planned uses in the area.

The development will enhance the architectural standards by providing a craftsman style that is compatible with the existing style of homes in the neighborhood.

8. Under any proposed zoning classification, whether the use proposed may create a nuisance or is incompatible with existing uses in the area.

The proposed zoning classification will not create a nuisance and is not incompatible with existing use in the area. We are planning on building two new single family homes that are consistent in size and design. We have evaluated all the existing styles and sizes and based our design on the past and current trends in the neighborhood.

9. Whether due to the size of the proposed use, in either land area or building height, the proposed use would affect the adjoining property, general neighborhood and other uses in the area positively or negatively.

The proposed home will be consistent in size and scope as surrounding homes and will positively impact the neighborhood. Our proposed homes will be built to very similar size and design as existing homes in the neighborhood. Our building heights and foot prints will not negatively stand out in neighborhood.
