

# Administration Update

May 11, 2017

- Campbell/Carolyn Drive
- Concord Road Linear Park
- Lighting on Spring & Atlanta Rds
- Google Fiber Update

# Concord Road Linear Park Landscaping

# Concord Road Linear Park Parking Lot

# Carolyn/Campbell @ Spring Road Intersection Improvements

- Reduced width of median to improve left turn sight distance
- Widened the turning radius to make for an easier U-turn

# Estimates for Pedestrian Lighting on Spring & Atlanta Road

- **Spring Road**
  - From Bell Drive to CSX Bridge
  - \$983,800
  - Pedestrian lights placed on the North (linear park) side
  - 80 foot spacing
  - Priced at \$115/linear feet
- **Atlanta Road**
  - From Concord Road to City Limits (Ridge Road)
  - \$849,700
  - Pedestrian lights most likely on West side
  - 80 foot spacing
  - Priced at \$115/linear feet

**\*Full design and hard quote would take 4 weeks\***

# Google Fiber Update

- **Change in leadership**
  - New CEO - Greg McCray
  - Been in place for about a month
  - Has confirmed commitment to the Atlanta Metro area
- **Changing the process for laying/installing the fiber**
  - The underground method Google has been using is proving to be too problematic (across entire metro area) and cost prohibitive.
  - Google has been testing a new process called “micro-trenching” in other markets, but has not officially confirmed this new method yet.
  - Greg McCray has extensive background in “micro-trenching”
- **Timeline**
  - It is still too soon for them to provide a timeline for service, but they hope to do so in the near future.
