Presentation of the Draft Spring Road Corridor Livable Centers Initiative Master Plan by the Sizemore Group.

ISSUE: Overview of the Spring Road Corridor Livable Centers Initiative Master Plan. The plan addresses land use and transportation issues along the Spring road Corridor from Cobb Parkway (U.S. 41) west to Atlanta Road. The study area/corridor runs along both sides of Spring Road from Cobb Parkway to Atlanta Road (approximately 2.4 miles). The study analyzes the land use, transportation and urban design issues, opportunities and challenges along the aforementioned corridor and makes recommendations for addressing those issues.

BACKGROUND: On December 7, 2015, the City's Community Development Department was authorized by City Council to submit an application to the Atlanta Regional Commission (ARC) to fund a land use and transportation study for the Spring Road Corridor. In February 2016, the City was notified that a grant in the amount of \$100,000 was awarded by the ARC. The City Council subsequently took official action at its' April 18, 2016 meeting to accept the grant award.

The funding for this grant is provided under the Livable Centers Initiative (LCI) Program administered by the ARC and financed by a grant from the U.S. Department of Transportation through the Georgia Department of Transportation. The purpose of the grant is to fund a land use and transportation study of the Spring Road Corridor. The grant requires a twenty (20%) percent match from the City which is \$25,000. The match amount is calculated on the total study cost of \$125,000 ($\$125,000 \times .20 = \$25,000$). The \$25,000 match was included in the FY2017 budget. The total amount available for the study is \$125,000 (\$100,000 grant + \$25,000 match).

RECOMMENDATION/REQUESTED ACTION: No action is requested.
